

Our "Ladies' Home" Journal

PETERSBURG
Home for Ladies

SINCE 1925

The 2021
Summer/Fall Edition

Petersburg Home for Ladies excitedly welcomes Mrs. Laura Bass to our caregiving team. As an Adult-Geriatric and Psych-Mental Health Nurse Practitioner, with experience providing medical care to geriatric residents in assisted living and memory care facilities, Mrs. Bass enjoys working with geriatric clients and is passionate about meeting the mental health needs of this population. Mrs. Bass has worked with Petersburg Home for Ladies, as a dual certified Nurse Practitioner, and has recently obtained a Post-Master's Degree in Psych-Mental Health, affording her the opportunity to expand her mental health services in a manner that supports our staff and undergirds our residents. It is truly a delight to have Mrs. Bass on our caregiving team. We are excited to see her influence, and her impact, on our culture of Elegant Living with Exceptional Care.

The Migration Continues...

Our ladies have thoroughly enjoyed studying the life cycle of the monarch butterfly throughout the summer and into the fall. With support from Virginia Master Naturalist Tom McKee, and as an official pollinator garden registered through project monarch watch, residents of Petersburg Home for Ladies have been able to tag these gentle creatures and report their data to the national database.

It Takes A Village...

Petersburg Home for Ladies is grateful to our vendors who creatively support, and enthusiastically encourage, both our staff and our residents alike! It is wonderful to be connected with those in the heart of the Petersburg Community and to see the joy that is shared when people with a common vision invest in one another. Special thanks to Walnut Hill Pharmacy and to At Home Care for all the support your organizations have shown us.
